<i>Preface to Technical Series</i>	xiii
<i>Preface</i>	xv
<i>Contributors</i>	xvii
1 Types of Fermented Milks	1
R.K. ROBINSON AND A.Y. TAMIME	
1.1 Background	1
1.2 Evolution of the process	2
1.3 Diversity of fermented milks	2
1.4 Patterns of consumption	4
1.5 Manufacture of fermented milks	6
1.6 Conclusion	7
References	8
2 Starter Cultures	11
A.Y. TAMIME, A. SKRIVER AND L.-E. NILSSON	
2.1 Introduction	11
2.2 Types and nomenclature of the starter organisms	12
2.2.1 Traditional lactic acid bacteria	12
2.2.2 Non-traditional microflora	12
2.2.3 Yeasts and moulds	13
2.3 Partial characterisation of the starter microflora	14
2.3.1 Carbohydrate metabolism	14
Fermentation pathways	14
Sugar transportation and hydrolysis	15
Generation of energy	16
2.3.2 Citrate metabolism	19
2.3.3 Formation of acetate, formate, acetaldehyde and ethanol	21
Pyruvate dehydrogenase complex	21
Pyruvate formate lyase	22
Acetolactate formation	22
Acetoin and diacetyl formation	23
2.3.4 Production of exopolysaccharides	23
Structure and characterisation	24
Chemical composition and biosynthesis	24
Influence of exopolysaccharides on texture	25
Role of exopolysaccharides in the microstructure of the gel	25

2.3.5	Bacteriocins	26
	Classification of bacteriocins	26
	Class I – characterisation, structural properties and mode of action	27
	Class II – characterisation, structural properties and mode of action	28
	Class III – characterisation, structural properties and mode of action	29
	Application of bacteriocins in fermented milks	29
2.4	Development of starter cultures	31
2.4.1	Development of new bacterial strains	31
2.4.2	Blending of cultures	32
2.4.3	Characterisation of cultures	33
	Acidification rate	33
	Texture determination	33
	Flavour assessment	35
	Miscellaneous factors	35
2.5	Production and preservation of commercial starter cultures	35
2.6	On-site production and use of starter cultures	37
2.6.1	Background	37
2.6.2	In-line inoculation with freeze-dried or frozen concentrated culture	38
2.6.3	Automatic inoculation system	41
2.7	Future developments	42
	Acknowledgements	42
	References	43
3	Manufacture of Yoghurt	53
	R.K. ROBINSON, J.A. LUCEY AND A.Y. TAMIME	
3.1	Background	53
3.2	The basic requirements for making yoghurt	55
3.2.1	Introduction	55
3.2.2	Milk as the base material	56
3.2.3	Standardisation of fat content and fortification of solids-non-fat content	56
3.2.4	Other ingredients	59
3.3	Initial processing	60
3.4	Fermentation	62
3.4.1	Background	62
3.4.2	Microbiology of fermentation	64
3.5	Coagulation of the milk	66
3.6	Final processing	68
3.6.1	Cooling	68
3.6.2	Fruit–yoghurt blending	68
3.6.3	Packaging	69
3.7	Post-production problems	69
3.8	Conclusion	70
	References	71

4 Properties of Yoghurt and their Appraisal	76
R.K. ROBINSON AND P. ITSARANUWAT	
4.1 Background	76
4.2 Chemical composition	77
4.2.1 Primary constituents	77
4.2.2 Secondary constituents	78
4.3 Assessment of physical characteristics	79
4.3.1 Physical nature of yoghurt	79
4.3.2 Physical characteristics of set yoghurt	80
Rheological properties	81
Rheological measurements	82
4.3.3 Stirred and drinking yoghurts	82
4.4 Colour	84
4.5 Microbiological analysis	85
4.6 Sensory properties and analysis	87
4.6.1 Sensory analysis of yoghurt	87
4.6.2 Attribute profiling of yoghurt	90
4.7 Conclusion	91
References	92
5 Production of Drinking Products	95
L.-E. NILSSON, S. LYCK AND A.Y. TAMIME	
5.1 Introduction	95
5.2 Types of fermented drinking products	96
5.3 Factors affecting product quality	96
5.3.1 Choice of milk	97
5.3.2 Additives	97
Stabilisers	97
Sugar and sweeteners	99
Fruit syrup and/or aroma	100
Miscellaneous additives	101
5.3.3 Deaeration	101
5.3.4 Homogenisation	102
5.3.5 Heat treatment	103
5.3.6 Choice of starter culture	103
5.3.7 Plant design	103
5.4 Manufacturing technique for fresh fermented milk drinks – cold distribution	104
5.4.1 Powder mixing equipment	104
5.4.2 Temperature for mixing powders	106
5.4.3 Miscellaneous treatments of the milk base	108
5.4.4 Incubation tanks	110
5.4.5 Cooling and miscellaneous treatments	111
5.4.6 Buffer tanks and fruit concentrate/aroma mixing	112

5.4.7	Packaging	113
5.5	Manufacturing techniques for long-life fermented milk drinks – ambient distribution	113
5.5.1	Production stages	113
5.5.2	Preparation of stabiliser solution	115
5.5.3	Cooling	116
5.5.4	Addition of sweetening agents and fruit juice concentrate	117
5.5.5	Final treatments of the fermented milk drink	117
5.6	Quality assessment	118
5.6.1	Stability	119
5.6.2	Particle size	119
5.6.3	Viscosity	120
5.6.4	Zeta potential	122
5.6.5	Sensory profiling	122
5.7	Miscellaneous fermented milk drinks	122
5.7.1	Background	122
5.7.2	Ayran	124
5.7.3	Dough	124
5.7.4	Carbonated yoghurt drinks	125
5.8	Conclusion	125
	References	126
6	Production of Concentrated Products	128
	B. ÖZER	
6.1	Introduction	128
6.2	Processing techniques	129
6.2.1	Traditional method (cloth bag)	130
6.2.2	Centrifugation method (mechanical separation)	133
6.2.3	Recombination/reconstitution method	136
6.2.4	Membrane methods	139
6.3	Microbiology of labneh	141
6.4	Organoleptic properties of labneh	143
6.5	Rheology and microstructure of labneh	145
6.6	Concluding remarks	149
	References	150
7	Nordic/Scandinavian Fermented Milk Products	156
	R. FONDÉN, K. LEPORANTA AND U. SVENSSON	
7.1	Historical aspects	156
7.1.1	Introduction	156
7.1.2	Historical background	157
7.2	Traditional Scandinavian products	157
7.2.1	Classification	157
7.2.2	Tätmjölk	158
7.2.3	Surmjölk	161
7.2.4	Filbunke	161

7.2.5	Buttermilk	161
7.2.6	Skyr	162
7.2.7	The microflora of starter cultures	162
7.2.8	Safety of traditional Scandinavian fermented milks	163
7.3	Some aspects of commercially available products	164
7.4	Specific characteristics/technology of Scandinavian fermented milk products	165
7.4.1	Långfil	165
7.4.2	Viili	166
7.4.3	Filmjök	167
7.4.4	Cultured buttermilk	167
7.4.5	Skyr	168
7.4.6	Ymer	169
7.5	Conclusions and future perspectives	169
	References	171
8	Production of Kefir, Koumiss and Other Related Products	174
	M. WSZOLEK, B. KUPIEC-TEAHAN, H. SKOV GULDAGER AND A.Y. TAMIME	
8.1	Introduction	174
8.2	Kefir	174
8.2.1	Historical background	175
8.2.2	Kefir grains	175
	Appearance and chemical composition	175
	Microflora of kefir grains	176
	Associative growth	182
	Commercially developed kefir starter cultures	183
8.2.3	Biochemistry of fermentation	184
	Microbial metabolism	184
	Metabolic pathways of yeast fermentation	186
	Production of exopolysaccharides	189
8.2.4	Production systems	190
	Production of kefir grains and starter cultures	191
	Manufacturing stages of commercial kefir	193
	Concluding remarks	194
8.2.5	Quality appraisal	194
	Chemical composition and microbiological quality	196
	Nutritional value	196
	Therapeutic properties	197
	Sensory properties	197
	Product faults	198
8.3	Koumiss	198
8.3.1	Introduction	198
8.3.2	Microflora of koumiss	199
8.3.3	Production systems	199
	Traditional process	199
	Industrialised processes	200

8.3.4	Compositional quality and nutritional properties	202
8.4	Miscellaneous products	203
8.5	Future developments	204
	References	205
9	Miscellaneous Fermented Milk Products	217
	S. LYCK, L.-E. NILSSON AND A.Y. TAMIME	
9.1	Introduction	217
9.2	Cultured/sour/fermented cream	218
9.2.1	Background	218
9.2.2	Production methods	219
	Stirred-type (cold distribution)	220
	Set-type (cold distribution)	221
	Long shelf-life (ambient distribution) cultured cream	221
9.3	Pasteurised stirred and fruit flavoured yoghurt	224
9.4	Frozen yoghurt or yoghurt ice cream	224
9.4.1	Background	224
9.4.2	Yoghurt ice cream or frozen yoghurt with live bacteria	226
	Frozen yoghurt with high yoghurt content	226
	Yoghurt ice cream with low yoghurt content	228
	Direct fermentation of the ice-cream mix	228
	Unfermented mixes	229
9.4.3	Yoghurt ice cream without live bacteria	229
9.5	Dried yoghurt	229
9.5.1	Introduction	229
9.5.2	Method of manufacture	230
9.6	Yoghurt-based desserts	231
9.6.1	Yoghurt mousse	231
	Stabilisation of aerated dairy desserts	231
	Method of production	232
9.6.2	Demoulded-type or gelled yoghurt	233
	Long shelf-life product	233
	Short shelf-life product	234
9.7	Conclusion	234
	References	235
10	Mechanisation, Automation and Future Developments	237
	H. ELIASSON	
10.1	Introduction	237
10.2	Structure and different levels of automation	238
10.3	Hardware development	240
10.3.1	Programmable logic controllers	240
10.3.2	Communication and valve tops	241
10.3.3	Programme controller and servers	241
10.4	Building an integrated plant and automated system	241
10.4.1	Local process control and user interface	242

10.4.2	Process line control	242
10.4.3	Plant control and management	242
10.5	The yoghurt production process	243
10.5.1	Quality control and interlocking	244
10.5.2	Strict batch control by recipe management	244
10.5.3	Logging production data	246
10.5.4	Traceability	246
	Legal demands	246
	Commercial and market demands	247
	Standards	248
	Traceability solution	248
10.5.5	Analysing the production	250
10.5.6	Analysing the product and the process	250
10.5.7	Security	252
10.5.8	Remote connection	252
10.6	Future developments	253
	References	253
